Before

7 days post treatment (Micro Botox®)

Histology test conducted by Dr. Daniel Del Vecchio and Dr. Louis Bucky during Lipoplasty on live human skin.

AQUAGOLD®  
MICROCHANNEL TECHNOLOGY®

fine touch™

What our physicians and patients have to say about AQUAGOLD® fine touch™

"This is a great procedure to brighten skin and improve skin quality. I love this treatment especially for the thin skin around the eyes. There is virtually no downtime for this treatment so it's the perfect treatment before an event, but with a series of treatments, patients have noticed longer lasting improvements in skin quality."

Sarmela Sunder, MD  
Double Board-Certified Plastic Surgeon  
(Beverly Hills, CA)

"A 'super mega facial', which takes 20 minutes to give you smaller pores, brighter tone, extra hydration reduced fine lines and general skin joie de vivre."

Laura Dyer, MSHS, PA-C  
Dr. Amy Wechsler Dermatology  
(New York, NY)

"I was desperate for a miracle to bring my skin back to life... My derm, Laura Dyer, recommended the AQUAGOLD facial, which she calls a 'noninvasive alternative' - if you can call tiny needles being stamped on your face noninvasive. But the result? Magic!"

Zanna Roberts Rassi  
Editor at Large for Marie Claire  
(New York, NY)

For the ultimate skincare regimen, the SKINWORKOUT™ system is the perfect take-home maintenance kit in between AQUAGOLD® fine touch™ treatments. Visit [www.skinworkout.com](http://www.skinworkout.com) for more information!
