THERA-CLEAN BATHS

Let Patchie tell you about our Thera-Clean Microbubble Baths:

This tranquil pet spa also offers Thera-Clean microbubble baths that is completely hypo-allergenic, providing a deep natural clean to help with

- **Shedding**
- **Arthritis**
- **Odors**
- **Skin Allergies**
- **Dry Skin**
- **And more!!!!**

This is Chewie! He was a surrender at a local shelter and had a terrible skin allergy to fleas and lost all of his hair. We did 5 of our Thera-Clean Bath Treatments and have seen amazing results in his hair growth! When we followed up with his vet, he said we had advanced his hair growth by 4 weeks!! He is a healthy, fun, beautiful boy! A round of Appaws for this amazing treatment! Call today for your Thera-Clean Bath or Doggie Spa needs!

All staff at Bark & Play and The Bark Spa are Pet CPR and First Aid trained

HOW A THERA-CLEAN BATH CAN HELP YOUR PET

DEEP NATURAL CLEAN
It doesn't get more all-natural than just water and nothing can clean deeper.

REDUCES ODOR
Most bad odors that come from pets are signs of skin issues deep down within the pores & hair follicles. A *Thera-Clean bath* now makes it possible to clean out all the irritants that cause bad odor.

REDUCES ITCHING & SCRATCHING
Constant itching & biting can lead to increased problems. With clean & healthier skin, the itching & biting diminishes and so does the risk of secondary infections.

REDUCES SHEDDING
The cleaner the skin and hair, the healthier it is. Healthy hair is stronger hair, in turn, holding onto the skin for that much longer. It's a cycle that all starts with the skin.

ENVIRONMENTALLY FRIENDLY
The future of our environment is extremely important. A *Thera-Clean bath* uses no chemicals what-so-ever. Only a plant and mineral based enzyme is used to assist the billions of micro bubbles lift the debris up from your pets skin and pores.

REDUCES STRESS & ANXIETY
Daily stress and anxiety for a pet can be harmful. A *Thera-Clean bath* relaxes both dogs and cats to a level similar to a deep tissue massage as the micro bubbles clean their bodies.

COMPLETELY HYPO-ALLERGENIC
It is impossible to have an allergic reaction to a *Thera-Clean bath*. Why? Because it's just water.

NO ADDITIONAL SKIN IRRITATION
A *Thera-Clean bath* does not require direct contact with already sensitive skin (aside from warm bubble infused water). There are no detergents or chemicals involved and no risk of additional reactions.

IMPROVES THERAPEUTIC RESULTS
Whether it's medicated shampoo or a prescription from a veterinarian, the *Thera-Clean bath* cleans and clears the pores dramatically. It helps prepare your pet to respond more effectively to other protocols and enhances the efficiency of conventional medicines.

SPA DAY?
Your pet doesn't have to have a skin issue to take advantage of a *Thera-Clean bath*. Your pet may look good but there's only one way to be sure there's no bad bacteria, that causes skin issues, growing deep down inside the skin. So reward your pet with a day at the spa with a nice relaxing *Thera-Clean bath* all the while assuring yourself their skin is clear of dirt, debris, and bacteria.

GOT DRY SKIN?
Does your little fur baby have dry skin? Ask for *Moisture Plus* to be added to your *Thera-Clean bath*. It will give your pet the much needed moisture boost inside their pores replenishing essential oils the skin needs.

Make the difference in your pets skin health today.....

because **CLEAN** skin is **HEALTHY** skin.™

THERA-CLEAN®
MICROBUBBLES

HOW DO **MICRO BUBBLES** CLEAN DEEP INSIDE THE PORES?

THE BARK SPA
1200 N 7th St
Burlington, IA
52601

(319) 752-7682

The size of a pore is (30μ m =30/1,000mm) and the size of a micro bubble is (20μ m= /1000-20/1,000mm). The micro bubbles are just water and air. Oil and water repel so the microbubbles alone will not remove the sebum crust on its own. The Toji enzyme powder will eat away at the sebum crust breaking it down and making it softer, in turn the broken-down sebum will be removed by the micro bubbles. After the sebum is removed, then the micro bubbles travel deep into the pore where it will clean out the pore completely.
