

In addition to general construction, we specialize in offering spray foam in open and closed cell, and blow-in insulation. If you can see it, we can foam it. Our commitment to our customers is to arrive in a timely fashion, communicate openly and honestly after our spray foam needs assessment and estimate, timely project completion, and a clean job site! Contact ZWB to schedule your appointment or to get your FREE estimate TODAY!

### Services

- New Construction Spray Foam Insulation: Installed at the same point in construction when traditional insulation would be installed. Performs up to 50% more energy efficiently
- Retrofit and Remediation: Eliminate mold(s) and mildew by removing old insulation or install insulation in empty walls to improve energy performance and indoor air quality
- Commercial and Agricultural: Extend the life of buildings, mechanicals and inventory eliminating the movement of moisture laden air through walls
- Steel Frame Construction: Ideal for insulating hat channels and C-channels and won't corrode metal studs

### Product Types

- Open Cell: R-4/inch; less dense, Enhances sound deadening, The R-value cost is lower than closed cell
- Closed Cell: Stronger than open cell foam, R-7/inch; Higher R-value than open cell foam, High resistance to air or water vapor leakage, More dense than open cell foam, therefore requiring less material
